🎯 Quick Fix Guide - Vercel Deployment Issue

Issue: Build succeeds but output directory not found
Cause: Vercel project settings not configured for Turborepo monorepo
Solution: 2 minutes to fix in Vercel dashboard

⚡ Quick Fix (2 minutes)

Step 1: Configure Root Directory

Go to: https://vercel.com/tindeveloper/manufacturer-intelligence-interface-web/settings

General → Root Directory:
1. Click **Edit**
2. Enter: `apps/web`
3. ✅ Check: "Include source files outside of the Root Directory in the Build Step"
4. Click **Save**

Step 2: Add Environment Variable

Settings → Environment Variables:
1. Click **Add New**
2. Name: `ABACUS_API_KEY`
3. Value: `2802fae65af84b98883a39078c3929dd`
4. Select: ✅ Production, ✅ Preview, ✅ Development
5. Click **Save**

Step 3: Redeploy

Deployments Tab:
1. Find latest deployment (commit: `955c1dd`)
2. Click "…" menu
3. Click **Redeploy**
4. ✅ Done!

✅ What to Expect

After redeployment:
- Build completes successfully
- Output directory `.next` is found
- App deploys to your Vercel URL
- Dashboard loads with both pipelines
- All features work correctly

📊 Current Status

Item	Status
Turborepo Setup	✅ Confirmed
Build Process	✅ Working
Code Configuration	✅ Complete
Vercel Settings	⏳ Needs configuration
Environment Variable	⏳ Needs configuration
